

**Description of New Features and Bug Fixes at Version 5.01b**

			Description
1	New	Solver Options	Two new 'post' solver types have been added to specifically deal with a new sliding mono-shock suspension template (see item 2)
2	New	Mono-shock template	A new template, No. 34, has been added to deal with 'formula' type mono-shock suspensions that use a 'sliding' rocker to accommodate roll.
3	New	Batch command	Added a sequence of new commands under 'data compliance' to load external force sets from saved files from a batch command.
4	Change	Dynamic Cursors	Enabled dynamic cursors in the Raven module.
